Re: RICE Rule Notification of Applicability  
Designation of Emergency Status

Dear Ms. Brockshus:

On August 23, 2010, we transmitted Initial Notification of Applicability forms on behalf of four Iowa municipalities, all of whom are members of the Upper Midwest Municipal Power Agency. The forms provide required information under 40 CFR Part 63 Subpart ZZZZ (Rules), but did not indicate whether the generating units owned and operated by these municipalities should be designated as emergency RICE units subject to section 63640(f) of the Rules. In view of the release of the EPA's final amendments to the Rules on January 15, 2013, this transmittal is intended to provide the Department of Natural Resources, as well as EPA Region V, with formal notice of the emergency engine status of the facilities. The units, and their status, are listed on Attachment A to this notice for each of the following municipalities:

Forest City Light & Power  
McGregor Municipal Utilities

Lake Mills Municipal Light & Power  
Osage Municipal Utilities

Sincerely,

Charles Christensen, Chairman  
Upper Midwest Municipal Power Agency

Cc Rebecca Weber, Director  
Air and Waste Management Division  
EPA Region VII  
11201 Renner Blvd  
Lenexa, KS 66219

Individual Iowa UMMPA members (via electronic mail)
